

# M3 offline evaluation: complete execution, poor BKT prediction

run\_id m3-offline-20260924-final6 | Fake Provider | constructed developer cases | no human participants

A

## Offline evaluation matrices

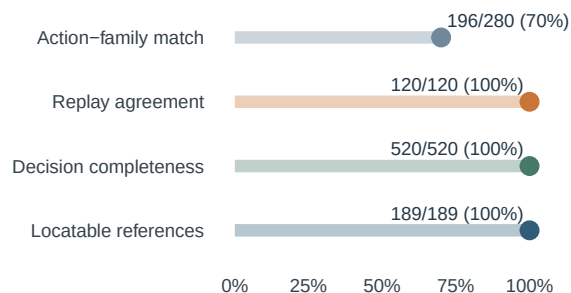

Completed / planned fixed developer-fixture cells

B

## Automated strategy and replay checks

Separate denominators; not teacher ratings

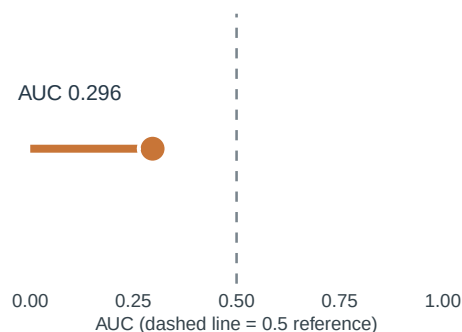

C

## BKT prediction

Brier 0.366 | Log loss 0.936 | ECE 0.530

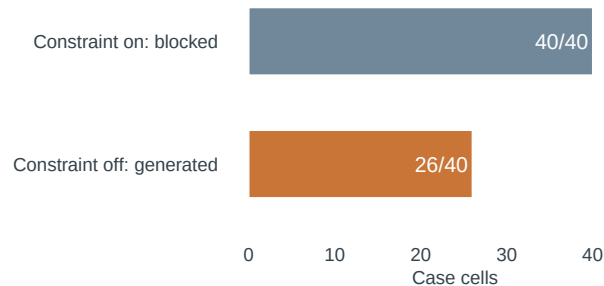

n=120 (70 positive; 50 negative)

D

## Evidence-gap behavior

40 constructed cells; blocked versus generated

Engineering path checks only. Action match is not teacher rating; locatable references do not prove semantic support.

BKT uses unfit development parameters. Ablation records path behavior, not answer correctness.
